

CURRICULUM VITAE

PERSONAL INFORMATION

Name: Christopher Adeyemi
Address: Augusttorwall 2, 38100 Braunschweig
Tel: +49 17287 58840
E-Mail: adeyemi504@gmail.com
Portfolio Website: <https://cadeyemi.work/>
GitHub: <https://github.com/Chrisblurp>
Date Of Birth: 05.01.1995
Nationality: Nigerian

Professional Summary

Junior Cloud & DevOps Engineer with hands-on experience building cloud-native infrastructure and automating CI/CD pipelines using Kubernetes, Docker, Terraform, Jenkins, AWS and Azure. Experienced in container orchestration, GitOps workflows, monitoring and Infrastructure as Code. Strong analytical and problem-solving skills developed through years of operational and military experience. Highly adaptable team player with strong technical curiosity and excellent communication skills. Based in Germany with English and German language proficiency.

Technical Skills

Cloud & Platforms

- AWS
- Azure
- GCP

Containers & Orchestration

- Docker
- Kubernetes (K8s)
- Helm

Infrastructure as Code & Automation

- Terraform
- Ansible

CI/CD & GitOps

- Jenkins
- GitHub Actions
- ArgoCD
- CI/CD Pipelines

Monitoring & Observability

- Prometheus
- Grafana
- Loki
- CloudWatch

Programming & Databases

- JavaScript
- Python
- SQL
- Node.js
- Express.js

Operating Systems & Tools

- Linux
 - Git
 - GitHub
 - WordPress
 - MS Office
-

DevOps & Cloud Projects

Blood Donor Management System

Docker | Kubernetes | Helm | Django | CI/CD

- Developed and deployed a containerized full-stack blood donor management application
 - Deployed the application on Kubernetes using Helm charts
 - Implemented automated CI/CD workflows
 - Managed scalable container infrastructure using Docker and Kubernetes
-

AKS Cloud-Native Platform

Azure AKS | Terraform | ArgoCD | Prometheus | Grafana

- Built a production-style Kubernetes platform on Azure AKS
 - Provisioned infrastructure using Terraform (Infrastructure as Code)
 - Implemented GitOps continuous delivery with ArgoCD
 - Configured monitoring and observability using Prometheus and Grafana
-

AWS ECS Blue-Green Deployment

AWS ECS | Jenkins | Terraform | CloudWatch | ALB

- Designed a zero-downtime blue-green deployment architecture on AWS ECS
 - Automated CI/CD processes using Jenkins
 - Provisioned AWS infrastructure with Terraform
 - Configured monitoring and logging using CloudWatch
-

Microservices DevOps Platform

Kubernetes | Docker | GitOps | Prometheus | Helm

- Deployed a distributed microservices architecture using Kubernetes
 - Managed containerized services with Docker and Helm
 - Implemented GitOps-based deployment workflows
 - Built centralized monitoring and observability solutions
-

Jenkins CI/CD Pipeline

Jenkins | Docker | GitHub

- Built automated Jenkins CI/CD pipelines integrated with GitHub
 - Containerized Jenkins environments using Docker
 - Automated build, testing and deployment workflows
-

WORK EXPERIENCE

12.2025 - Ongoing

Amazon Logistic Center

QAPS (Problem Solver)

- Analyze and resolve operational issues in large-scale logistics systems
- Identify root causes and support process improvements
- Work in high-volume, time-critical operational environments
- Collaborate with cross-functional teams to improve system efficiency and reliability
- Uses of different computer tools and softwares to improve logistic efficiency

10.2025 – 01.2026
HNG Internship, Remote
DevOps Internship

- Participation in DevOps projects and cloud-based infrastructure tasks
- Support in building CI/CD pipelines and workflow automation
- Use of tools such as Docker, Git, Ansible, and cloud services for deployment optimization
- Collaboration with the team to improve development and deployment processes.

01.2024 – 04.2024
Advantec Marine Service, Lagos, Nigeria
Security Representative

- Monitoring safety processes in the port area
- Access and document control
- Support in hazard prevention

2023
Nigeria Employment Agency
Internship in Management & Administration

- Support in administrative tasks and office organization
- Participation in administrative and organizational processes
- Maintaining customer data and communication with clients

06.2014 – 11.2022
Nigerian Navy
Soldier / IT-Support / Signal & Communication / Navigation

- Leadership experience and basic military training
- Executive assistance and orderly duties supporting officers
- Customer service in the naval hospital including guidance and administrative tasks
- Leadership and coordination of teams aboard ships
- Support in administration, personnel, and information management
- IT support, data management, and technical assistance
- Communication and coordination in multinational operations
- Navigation and ship handling

FURTHER TRAINING

09.2025	–	01.2026	Deutsch C1 – Volkshochschule Braunschweig
09.2025	–	03. 2026	IBT Devops Online Bootcamp (Ansible, Jenkins, CI/CD AWS)
2023			AYAHQ Backend Software Engineering (Node/Express JS)
2023			Scrum Fundamentals Certified
2022			Graduate Specialist Occupational Security, Health and Safety – Yaba School of Technology Consult
2022			Nigerian Armed Forces Resettlement Center (Information Technology and Business Management course)

EDUCATION

2020 - 2024	Ahmadu Bello University, (Business Administration (Bachelor) Zaria Nigeria
2012	West African Examination Council (WAEC), O-Level Certificate
2006 – 2010	Secondary School Ojodu Abiodun Community High School

ADDITIONAL SKILLS

Languages	English (Mother Tongue) German – C1
------------------	--
